*"Full Stack Developer with 7+ years of experience and a strong focus on innovation and agile software development. I am looking for opportunities where I can contribute my skills in **Bootstrap, Python, Django, JavaScript, NodeJS** with **ReactJS** and **Postgresql** modern frameworks to create robust and scalable solutions."*

EXPERIENCE

University of Pacific, Senior React Developer — Decembre 2023 – April 2025

At Pacifico University, Pacifico served as a React Senior Developer from December 2023 to August 2024. During this time, he led projects utilizing the PERN stack (PostgreSQL, Express, ReactJS, Node.js), contributing to the development of robust and efficient web applications. Additionally, he actively participated in a project integrated with Python, Django, and PostgreSQL, showcasing his versatility and ability to work with a variety of technologies to meet the university's needs.

Microverse, Full Stack Developer — January 2023 – October 2023

As a Full Stack Developer at Microverse, my job is to design, develop, and maintain the software applications that power Microverse's online learning platform.

NexusTech Solutions, Desarrollador Full Stack — January 2020 - December 2022

At NexusTech Solutions, a remote-first software development company based in South America, I worked as a Full Stack Developer specializing in the PERN stack (PostgreSQL, Express, ReactJS, Node.js) and Python with Django. My responsibilities included designing and implementing scalable web applications, optimizing database performance with PostgreSQL, and collaborating with cross-functional teams to deliver high-quality solutions for clients across the region.*

Revolut, Mid-Level Python Developer — March 2017 – December 2019

Revolut is a fintech company that offers banking services. We offer currency exchange accounts, debit cards, virtual cards, and safe deposit boxes.

Lauzon, Junior Python Developer — December 2015 – January 2017

Lauzon is a financial company headquartered in São Paulo, Brazil. They serve many local companies and startups by providing customized financial software. Tech stack: Python and Golang
